Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to computer input device, classified in class 345, subclass 156.
- II. Claims 6-7, 44-45, 87, and 95, drawn to film viewing device, classified in class 348, subclass 14.3.
- III. Claims 8-14, 38-43, 46, 70-72, 89, and 100, drawn to iconic layout, classified in class 345, subclass 763.
- IV. Claims 15-17, 47-49, 73-74, and 90, drawn to printer communication, classified in class 358, subclass 1.1.
- V. Claims 18-23, 50-55, 80-82, 91-94, and 100, drawn to brightness and contrast adjustment, classified in class 345, subclass 589.
- VI. Claims 24-25, 56-57, 76-77, 102-103, drawn to display delay mechanism, classified in class 345, subclass 212.
- VII. Claims 26-27, 58-59, and 88-89, drawn to auto load mechanism to permit review a preprogrammed series of image, classified in class 345, subclass 704.
- VIII. Claims 28-31, 60-63, 96-97, drawn to navigation among historical images, classified in class 345, subclass 854.
- IX. Claims 64-68, 78, 83-86, 98-99, 104-107, drawn to loading unit, classified in class 345, subclass 749.

Inventions I, II, III, IV, V, VI, VII, VIII, and IX are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each one of the inventions recited in groups I, II, III, IV, V, VI, VII, VIII, and IX is separately usable in a system not having the other. For example, invention of group I has separate utility such as in an independent display system having different types of input mechanism such as a barcode scanner, a camera, a microphone and a voice recognition system, etc., without a film viewing device, an iconic layout configuration, a printer communication system, a brightness and contrast adjustment system, a display mechanism, an auto load mechanism to permit review a preprogrammed series of image, a navigation system among historical images, and a data loading unit, and vice versa.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their divergent subject matter, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LUU MATTHEW whose telephone number is (703) 305-4850. The examiner can normally be reached on 9 hrs.
